Our Strengths

A comprehensive approach from gap analysis to implementation

- Analysis of the existing situation
- Development of a roadmap
- Support in strengthening technical regulations and inspector's manuals
- Training of inspectors (theoretical and OJT)
- Support in updating the ICAO Online Framework

Tailored project to the client organization's individual requirements

- Growing together and open approach
- Client empowerment strategy: one step to autonomy
- Staying agile and open to innovative approaches
- Win-win technical cooperation
- Remain independent and objective

We work with experts with a very good operational & regulatory knowledge

- We bring in practising DGAC experts or young retirees who understand the compliance & regulatory challenges your organisation may face.
- Our experts have a very good knowledge of ICAO and EASA standards
